

Autoclave

Moist heat sterilization at above 100 degree C. It is generally used for sterilization of heat resistant materials. This device is used to sterilize materials such as glass, ceramic and metal or non-metallic, water, media and solvents resistant to high temperature and high vapor pressure.

Device Name: : Hirayama HG 50

Device Hardware and Features:

- 50 liter capacity
- Sterilization temperature 105 °C / 135 °C
- Heating temperature 45 °C / 60 °C
- Maximum sterilization pressure 0.26 Mpa
