

Refrigerated Centrifuge

Device name: :Sigma 3 -18 KS

Device Hardware and Features:

- Universal refrigerated table top centrifuge; speed range up to 18 000 rpm.
- Rotation with microcontroller unit, RCF (centrifugal force), operating time and temperature adjustment.
- 10 quadratic and 10 linear preset deceleration and acceleration curves. 10 curves can be programmed and saved. This will help eliminate re-suspension
- Run time can be set up to 99 hours and 59 minutes.
- Possibility of low-cycle operation for cell sediments
- All rotors can be pre-cooled before operation.
